JAPAN, 1920 - 1948 - Cont'd. FABLE 1. - POPULATION BY PREFECTURE:

POOT NOTES:

Population data refer to the total population including military personnel in Japan Proper each year. Estimates are as of 1 October the period 1920 - 1945 and as of 1 July for 1946-1948. for

The total population was estimated for each year, based upon census data, net natural increase and migration. Censuses were taken on 1 October 1920, 1929, 1930, 1935 and 1940, 22 February 1944, 1 November 1945, 26 April 1946 and 1 October 1947 and a ration count was made on 1 August 1948. The population counts of 1920, 1925, 1930 and 1935 were accepted as enumerated. Adjustments were made in the 1940 enumeration to exclude military personnel outside the country and adjustments for undersemmentation were made in the figures for 1945 and 1946.

population as of 1 July 1947 was distributed by prefecture according to the census of October 1947. The estimated population as of 1 July 1948 was distributed by prefecture according to the ration count of 1 August 1948. The estimated annual total populations for the period of 1920-1944 were distributed by prefecture according to the prefectural distribution at the last previous census. The estimated total population as of 1 October 1945 was distributed according to the census of 1 November and the estimated population as of 1 July 1946 was distributed according to the census of 26 April 1946. The estimated

population for the year. This is not true of the estimated civilian population or the estimated military personnel in the country taken It should be noted that the estimated total population in Japan as of 1 October 1945 is the same as the estimated average total separately as of 1 October, 1 November or "on the average" due to the cessation of hostilities and demobilization during October.

Population for all Japan for 1941-1945 differ slightly from those published in July 1948 by the Economic and Scientific Section. SCAP, due to differences in estimating annual migration.

TABLE 2. - 1/ POPULATION BY AGE: JAPAN, 1920 - 1947 - Cont'd.

FOCTNOTES

military and civilian, residing in the four main islands and the small outlying islands and Okinawa. Years 1936-1947; includes 1/ All data are as of 1 October each year. Estimates by age are provisional. Years 1920-1935; Includes the population, both Economic and Scientific Section. Population estimates contained in Tables No. 1 and No. 3 are as originally computed and first because of certain adjustments contained in the estimates made and published by the Research and Programs Division, Totals for the population data shown on Tables No. 1 and No. 3 differ from those shown in this table for the years the population, both military and civilian, residing in the four main islands and the small outlying islands and excludes used in August, 1947 by the Health Statistics Division, Public Health and Welfare Section.

- 2/ Census enumeration adjusted.
- Census enumeration excluding estimated overseas military population of one million.
- 4/ Census enumeration unadjusted.

"NA" indicates date are not available.

SCURCES:-

Totals (all ages) for years 1920-1935 and estimates by age-group 1920-1943 and 1947; Institute of Population Problems, Ministry Notals (all ages) for years 1936-1947; Research and Programs Division, ESS, GHQ, SCAP. of Welfare.

TABLE 3. - POPULATION, LIVE BIRTHS, DEATHS, INFANT DEATHS, STILLFIFTHS, MARRIAGES AND DIVORGES: JAFAN, 1872 - 1948

. All 1948 data are provisional. All 1047 data are provisional except for deaths of all ages. Death data for 1947 have been corrected by the Final Annual Report, Ministry of Welfare,

1920-1948 are estimates based upon census data, not natural increase and migration to and from Japan Proper. Data for 1920-1945 are as of 1 October. Estimates for 1946-1948 are as of 1 July. Populations for 1942-1945 differ slightly from those published in July 1948 by the Economic and Scientific Section, GHQ, SCAP, due to differences in estimating annual migration. from the customery additions and subtractions to the Honseki population and are stated as of the end of each year. Populations period 1872-1876 are as of the beginning of each year, except for 1072, which is as of 29 January by the Lunar Calendar. From 1876 to 1898 they are based upon the population according to Honseki records. From 1899 to 1919 the populations were obtained 1 Data refer to the total population, including military personnel in the country. Data are for Japan Froper, 1872-1878 and For Japan Proper and Okinawa for the period 1879-1919. Data refer only to Japan Froper, 1920-1948. Population data for the

outside Japan is included in the tabulations for 1945. A small number of births of foreigners in Japan Proper is included from 2) Data for the pariod 1872-1879 include births or Japanese merions in Japan Froper, Orinama and outside as they were reported. Date for the period 1879-1898 include births of Japanese nationals in Japan Froper, Orinama and outside refer only to births of Japanese nationals in Japan Proper except as follows. A smell number of births of Japanese nationals January through July 1945.

only to deaths of Japanese netionals in Japan Proper except for the ps ried Jenuary through July 1945 when a small number of deaths territory. Data for 1809 to 1919 refer to deaths of Japanese nations is in Japan Proper and Okinews. Data for 1920 to 1948 refer mere reported. Data for the pariod 1879-1898 refer to deaths of Japanese nationals in Japan Froper, Okinawa and outside Japanese 3/ Dets for 1872-1878 refer to deaths of Japanese nationals in Japan Proper and outside Japanese territory in so far as they of foreigners in Japan and Japanese nationels outside Japan was included.

territory. Data for 1899 to 1919 refer to events to Japanese nationals in Japan Froper and Okinawa. Data for 1920 to 1948 refer only to events to Jajanese nationals in Japan Froper. Prior to 1925, data include all stillbirths reported. Data for 1925-1948 Available data for the period 1903-1898 refer to events to Japanese nationals in Japan Proper, Okinawa and outside Japanese refer to stillbirths after the third month. Deaths under 1 year of age.

"NA" indicates data are not available.

FOOTNOTES:

a Data for 1948 are provisional.

Rates are the number of deaths per 1,000 population,

Population data refer to the total population of Japan Proper including military personnel in the country.

Birth data refer only to deaths of Japanese mationals in Japan Proper except for the period Jamary through July 1945 when a small number of deaths of foreigners in Japan and Japanese nationals outside Japan was included.

SOURCES

Rates were computed by Public Health and Welfare Section, GHQ, SCAP.

Sources of original death data are as follows:

1920 - 1943: Annual Reports, Cabinet Bureau of Statistics.

1944: Unpublished tabulations, Cabinet Bureau of Statistics.

1945, January - July: Unpublished tabulations, Cabinet Bureau of Statistics,

Corrected by Public Health and Welfare Section, GHQ, SCAP to exclude estimated deaths of Japanese nationals outside Japan. 1945, August - December: Unpublished tabulations, Cabinet Bureau of Statistics.

1946, January - June: Unpublished tabulations, Cabinet Bureau of Statistics. Corrected by Public Health SCAP to exclude estimated deaths of Japanese nationals outside Japan Proper. Welfare Section, GHQ. 1946, July - September: Monthly Numeric Reports, Cabinet Bureau of Statistics. Corrected by Public Health and Welfare Section, GHQ, SCAP to exclude estimated deaths of Japanese nationals outside Japan.

1946, October - December: Monthly Schedule Reports, Cabinet Bureau of Statistics.

1947: Final Annual Report, Ministry of Welfare.

1948; Monthly Schedule Reports, Ministry of Welfare.

FOOTNOTES

*Data for 1946 and 1948 are provisional.

1/ Data for 1920-1942 refer to deaths of Japanese retionals in Japan Proper and Okinama. Data for 1943 refer to deaths of Jaranese Japanese nationals in Japan Proper, Okinama and Karafuto. Total deaths for the priod 1944-1946 refer to deaths of Jaranese mationals in Japan. Data for specific causes of death, 1944-1946, refer to deaths among Japanese nationals and foreigners In Jaran Proper and are limited to the civilian population only. All other death statistics include military personnel in the country. Data for 1947 and 1948 refer to Japanese nationals in Japan Proper.

All data for 1920-1943, 1947 and 1948 are based upon tabulations of death certificates. Total deaths for the years 1944-1946 are based upon death certificates. Specific cause data (except tuberculosis) for 1944-1946 are based upon follow-up reports on communicable disease cases. Data for tuberculosis deaths 1944-1946 are estimates prepared by the Ministry of Welfare.

Typhoid fewer, 1920-1943: includes typhoid pneumonia, 1944-1946, unknown whether typhoid pneumonia is included, 1947 and 1948, excludes typhoid pneumonia.

Scarlet fever, 1920-1943: includes puerperal scarlet fever, 1944-1946: unknown whether puerperal scarlet fever is included. 1947 and 1948 excludes ruerperal scarlet fever.

1923-1932: excludes diphtheric endocarditis and croupous bronchitis; includes larynges1 croup. 1944-1946: unknow whether Diphtheria, 1920-1922 and 1933-1943; excludes diphtheric endocarditis; includes croupous bronchitis and laryngeal croup, diphtheric endocarditis, croupous bronchitis, and larynges1 croup are included. 1947 and 1948 includes diphtheric endocarditis; excludes croupous bronchitis and laryngeal croup.

1948: excludes chronic pleuro pneumonia and nontubercular adenopathy; includes spondylitis. 1944-1946: are estimates of Tuberculosis (all forms), 1920-1943: includes chronic pleuro pneumonia and all adenopathy; excludes spondylitis. S

the Ministry of Welfare.

non-syphilitic aneurysm. 1933-1943: includes general paralysis of the insane, aneurysm of the worts and a small amount of paralysis of the insane, a small amount of non-syphilitic paralytic psychosis, ansurysm of the sorth and a small amount of Syphilis. 1920-1922: excludes general paralysis of the insane and aneurysm of the aorta. 1923-1932: includes general non-syphilitic aneurysm. 1947 and 1948: includes general paralysis of the insene and aneurysm of the sorts. 19

Typhus fever and typhus-like diseases. 1920-1943 and 1947 and 1948; includes typhus-like diseases. 1944-1946; typhus-like diseases. Simple meningitis. 1920-1943: includes acute cerobrospinal meningitis not due to meningococcus. 1947-1948: excludes

acute cerobrospinal maningitis not due to meningococcus.

8

excludes

Intracrantal lestons of wascular origin. 1920-1932: includes alcoholic cerebral apoplexy congestion and a small amount of paralysis not due to intracrantal lesions of vascular origin. 1933-1943; includes alcoholic cerebral apoplexy and congestion. 1947 and 1948; excludes alcoholic apoplexy and congestion.

TABLE 13. 1/ PEATHS FROM SELECTED CAUSES: JAPAN, 1920-1948 - Cont'd.

Diseases of the heart, 1920-1943: includes diphtheric endocarditis, 1947 and 1948: excludes diphtheric endocarditis. Bronchitts, 1920-1922 and 1933-1943; excludes croupous bronchitis, 1923-1932 and 1947 and 1948; includes croupous

Pneumonia (all forms), 1920-1943: excludes typhoid pneumonia, 1947 and 1948: includes typhoid pneumonia,

Ulcer of stomach or duodenum. 1920-1922: excludes ulcer of duodenum. 1923-1943; 1947 and 1948: includes ulcer of duodenum. Diarrhea, enterities and ulceration of the intestines (all ages). 1920-1943: includes mainutrition 1 year of age and over.

Unarrhea, enteritis and ulceration of the intestines (under 2 years). 1920-1943; includes malnutrition 1 to 2 years of age. 1947 and 1948: excludes malnutrition 1 year of age and over. 1947 and 1948; excludes malnutrition 1 to 2 years of age.

Distribes, enterities and ulceration of the intestines (2 years and over). 1920-1943: includes malnutrition, 2 years of age and over. 1947 and 1948 excludes malnutrition, 2 years of age and over.

16/

Diseases of pregnancy, chilidbirth and the puerperlum. 1920-1943: excludes puerperal searlet fever. 1947 and 1948: includes Nephritis, 1920-1943: includes alcoholic nephritis, 1947 and 1948: excludes alcoholic nephritis. puerperal scarlet fever.

Senility. 1920-1922: excludes senility with mention of senile dementia, jsychosis and jaresis. 1923-1943 1947-1948: includes sentlity with mention of senile dementia. 18/

1923-1943, excludes mainutrition I year of age and over. Excludes sudden death and found dead. 1947 and 1948 includes mainutriti 111-defined and unknown. 1920-1922; excludes melnutritian 1 year of age and over. Includes sudden death and found dead. 1 year of age and over. Excludes sudden death and found dead.

"MA" indicates data are not available.

A dash (-) indicates no deaths were reported.

Footnotes

Data for 1946 and 1948 are provisional.

for "all causes", 1944-1945, are based upon the estimated total population (including military personnel) in Japan Estimated populations include civilian and military in Jevan and Okinawa, 1920-1943. Death rates Rates are the number of deaths per 100,000 population, estimated as of 1 Cotober 1920-1945 and 1 July 1946, Rates for specific causes of death, 1944-1945 are based upon the estimated civilian population only. Rates for "all causes" and specific causes, 1946-1948 are based upon the estimated total population in Japan (There were no military personnel during this period),

Typhoid fever, 1926-1943: includes typhoid pneumonia, 1944-1946, unknown whether typhoid pneumonia is included.

947 and 1948 excludes typhoid pneumonia.

unknown whether diphtheric endocarditis, cruppous branchitis and larynges1 croup are included. 1947 and 1948; includes 1920-1922 and 1933-1943; excludes dirtheric endocarditis; includes croupous broachitis and laryngeal includes puerperal scarlet fever. 1944-1946; unknown whether puerperal scarlet fever croup. 1923-1932; excludes diphtheric endocerditis and encupous bronchitis; includes laryngeal eroup. 1944-1946; is included. 1947 and 1948 excludes puerperal scarlet fever. Scarlet fever. 1920-1943: Diphtheria.

Tuberculosis (all forms). 1920-1943: includes chronic pleuro pneumonia; excludes spondylitis; includes all adencpathy. 1947 and 1948. excludes chronic pleuro pneumonia; includes spondylitis; excludes nontubercular adenogathy. liphtheric endocarditis; excludes croupous bronchitis and laryr, geal croup.

Syphilis, 1920-1922; excludes general paralysis of the insane; excludes ameurysm of the sorta, 1923-1932; includes general paralysis of the insane, a small amount of non-syphilitic paralytic psychosis, ameurysm of the acuta and a small amount of non-syphilitic encurysm. 1932-1943: includes general paralysis of the insane and ancurysm of the acury of the acurysm of the small amount of non-syphilitic encurysm. 1947 and 1948: includes general paralysis of the insane and ancurysm of the 1944-1946; are estimates of the Ministry of Welfare,

1920-1943 and 1947 and 1948: includes typhus-like diseases. 1944-1946; Typhus fever and typhus-like diseases.

Simple meningitia. 1920-1943; includes acute cerobrospinal meningitis not due to meningoccus. 1947-1945; excludes acute cerobrospinal meningitis not due to meningoccus. excludes typhus-like diseases.

Intracranial lesions of wascular origin, 1920-1932; includes alcoholic cerebral apoplexy and congestion and a small

Diseases of the heart, 1926-1943; includes diphtheric endocarditis, 1947 and 1948; excludes diphtheric endocarditis, emount of paralysis not due to intracranial lesions of vascular origin. 1933-1945; includes alcoholic cerebral apoplaxy and congestion, 1947 and 1948, excludes alcoholic apoplexy and congestion,

Footnotes - Cont'd.

TABLE 14. - 1/ DEATH RATES FOR SELECTED CAUSES: JAPAN, 1920-1948

Bronchitis. 1920-1922 and 1933-1943; excludes croupous bronchitis. 1923-1932 and 1947-1948; includes croupous

Ulcer of stomach or duodenum, 1920-1922; excludes ulcer of duodenum, 1923-1943; 1947-1948; includes ulcer of Pneumonia (all forms). 1920-1943; excludes typhoid pneumonia. 1947 and 1948; includes typhoid pneumonia. duodenum

Distribes, enterities and ulceration of the intestines (all ages), 1920-1943; includes malnutrition 1 year of age Diarrhea, enteritis and ulceration of the intestines (under 2 years). 1920-1943; includes malnutrition 1 to 2 and over. 1947 and 1948 , excludes malnutrition 1 year of age and over.

Diarrhea, enteritis and ulceration of the intestines (2 years and over). 1920-1943: includes malnutrition, Nephritis. 1920-1943; includes alcoholic nephritis, 1947 and 1948; excludes alcoholic nephritis. years of age and over. 1947 and 1948; excludes malnutrition, 2 years of age and over. years of age. 1947 and 1948; excludes malnutrition 1 to 2 years of age.

Senility, 1920-1922; excludes senility with mention of senile dementia, psychosis and paresis, 1923-1943 and Diseases of pregnancy, childbirth and the puerperium, 1920-1943; excludes puerperal scarlet fever, 1947 and 1948, includes puerperal scarlet fever.

found dead. 1929-1943, excludes mainutrition 1 year of age and over. Excludes sudden death and found dead. 1947 and 111-defined and unknown. 1920-1922; excludes malnutrition 1 year of age and over. Includes sudden death and 1948; includes malnutrition 1 year of age and over. Excludes sudden death and found dead. 1947-1948, includes senility with mention of senile dementia.

A dash (-) indicates that no deaths were reported. "NA" indicates data are not available.

A rate of 0.0 indicates that there were some deaths but that the rate was less than 0.1.

Rates computed by Public Health and Welfare Section, GHQ, SCAP. Sources of original data are as follows:

1945 (Jan-Jul); Unpublished tabulations, Gabinet Bureau of Statistics. 944; Unpublished tabulations, Cabinet Bureau of Statistics.

Section, CHQ, SCAP to exclude estimated deaths of Japanese nationals outside Japan and of foreigners in Japan Proper. 1946 (Jan-Jun): Unputlished tabulations, Cabinet Bureau of Statistics, Corrected by Public Health and Welfare Corrected by Public Health and Welfare Section, GHQ, SCAP to exclude deaths of Japanese nationals outside Japan Proper. 1945 (Aug-Dec): Unpublished tabulations, Cabinet Bureau of Statistics.

TABLE 15. - 1/ DEATHS FROM THE TEN LEADING CAUSES OF DEATH; JAPAN, 1920 - 1948*

FOCTNOTE

- . Data for 1944-1946 are not available.
- Date for 1920-1942 refer to deaths of Japanese nationals in Japan Proper and Ckinswa. Data for 1943 refer to deaths of Japanese netionals in Japan Proper, Okinawa and Karafuto. Data for 1947 and 1948 refer to Japanese nationals in ** Data for 1948 are provisional.
- amount of paralysis not due to intracrantal lesions of vascular origin. 1933-1943; includes alcoholic cerebral apoplery Intracranial lesions of wascular origin. 1920-1932, includes alcoholic cerebral apoplexy and congestion and a small Tuberculosis (all forms), 1920-1943; includes chronic pleuro pneumonia and all adenopatby; excludes spondylitis, 1947 and 1948, excludes chronic pleuro pneumonia and nontubercular adenogathy; includes apondylitis.
 - Diarrhea, enteritis and ulceration of intestines (all ages). 1920-1943; includes malnutrition 1 year of age and over. and congestion. 1947 and 1948: excludes alcoholic apoplexy and congestion.
- Senility. 1920-1922: excludes senility with mention of senile dementia, psychosis and paresis. 1923-1943 and 1947-1948; 1947 and 1948; excludes mainutrition 1 year of age and over.
 - 1947 and 1948; excludes diphtheric endocarditis. 1920-1943; excludes typhoid pneumonia, 1947 and 1948; includes typhoid pneumonia, 1920-1943; includes diphtheric endocarditis. includes senility with mention of senile dementia. Pheumonia (all forms). Diseases of the heart.
- 111-defined and unknown. 1920-1922, excludes malnutrition 1 year of age and over. Includes sudden death and found dead. 1923-1943; excludes mainstrition 1 year of age and over, sudden death and found deed, 1947 and 1948; includes mainstriexcludes alcoholic nephritis. includes alcoholic nephritis. 1947 and 1948, tion 1 year of age and over. Excludes sudden death and found dead. Nephritis, 1920-1943;
- Pronchitis, 1920-1922 and 1933-1943; excludes croupous bronchitis, 1923-1932 and 1947-1948, includes croupous bronchitis. Simple meningitis, 1986-1943; includes soute cerebrospinal meningitis not due to meningococcus, 1947 and 1948; excludes acute cerebrospinal meningitis not due to meningococcus,

"NA indicates data are not available.

TABLE 16. - 1/DEATH RATES FOR THE TEN LEADING CAUSES OF DEATH: JAPAN, 1920 - 1948* Contid. (Ertes per 100,000 Population)

FOOTNOTE

* Data for 1944-1946 are not available. ** Data for 1948 are provisional.

populations include civilian and military in Japan and Okinawa, 1920-1943: Civilian population in Javan Proper, 1947 and 1948. Nates are the number of deaths per 100,000 population, estimated as of 1 October 1920-1943 and 1 July 1947 and 1948. Estimated

Tuberculosis (all forms), 1920-1943: includes circuic pleuro preumonia and all adenoratiy; excludes spondylitis, 1947 and 1948: excludes chronic pleuro pneumonia and nontubercular adenorating; includes srondylitis.

Intracranial lesions of wascular origin. 1920-1932: includes alcoholic cerebral apoplexy and congestion and a small amount of paralysis not due to intracranial lesions of vacular origin, 1933-1943; includes alcoholic cerebral appendany and congestion. 1947 and 1948: excludes alcoholic apoplexy and congestion.

Diarries, enteritis and ulceration of intestines (all ages), 1920-1943: includes melnutrition 1 year of age and over. 1947 excludes malnutrition 1 year of age and over.

1c20-1922: excludes semility with mention of semile dementia, psychosis and paresis. 1973-1943 and 1947-1948: includes senility with mention of senile dementia. Senility.

1920-1943: includes diphtheric endocarditis. 1947 and 1948: excludes diphtheric endocarditis. 1920-1943: excludes typhoid pneumonia, 1947 and 1948: includes typhoid pneumonia, Nephritis, 1920-1943: includes alcoholic nephritis. 1947 and 1948: excludes alcoholic nephritis. Fneumonia (all forms). Diseases of the heart.

1943, excludes maintiftion 1 year of age and over, sudden death and found dead. 1947 and 1948: includes maintiftion 1 year of III-defined and unknown, 1920-1922: excludes malnutrition 1 year of age and over. Includes sudden death and found dead, 1923-Excludes sudden death and found dead.

excludes acute Simple meningitis. 1920-1943: includes scute cerebrosrinal meningitis not due to meningococcus. 1947 and 1948: cerebrospinal meningitis not due to meningococcus.

Bronchitis, 1920-1922 and 1933-1943: excludes croupous bronchitis, 1923-1932 and 1947-1948: includes croupous bronchitis. 11/ Bronchitis. 1920-1922 and 1933-194

SOURCES:

Rates computed by Public Health and Welfare Section, GHG, SCAP., Sources of Original darks are as follows: 1920-1943: Annual Reports, Cabinet Bureau of Statistics. 1947: Finel Annual Report, Ministry of Welfare. 1948: Monthly Schedule Reports, Ministry of Welfare.

See footnotes on next page.

FOOTNOTES:

1 Rates are per 100,000 population as of 1 October each year.

to the fact that the tuberculosis death data for that period include Okinawa and the population data exclude Okainawa. All Population data (Table 2) and tuberculosis death data (Table 20) for the years 1020-1935 refer to comparable areas (Japan including Okinawa). On the other hand, a small unavoidable error will be found in the rates for the years 1936-1943, due data for 1944-1947 refer to Japan Proper only.

"NA" indicates data are not available.

SOURCES:

Rates were computed by Public Health and Welfare Section, GHw, SCAP.

Sources of original data are as follows: Population (all ages) for years 1936-1947; Research and Frograms Division, ESS.

Population (all ages) for years 1920-1935 and age-group distribution 1920-1943 and 1947; Institute of Fopulation Froblems, Ministry of Welfare, See footnotes on Table No. 2.

Tuberculosis death data: Special Report, Health Statistics, Winistry of Welfare.

1921	1,976,055	7,105	3.6
1920	2,011,634	7,078	3.5

FOOTNOTES:

*Live birth data for 1947 and 1948 are rovisional. Maternal death data for 1948 are provisional.

Rates for 1947 and 1948 are provisional.

1/ Live births of Jaranese nationals in Jaran Proper except in 1943.

Data for 1943 include live births of Jaranese nationals in Okinawa and Karafuto as well as Japan Proper. The number of births, in 1943 in Jaran Proper only was 2,235,431.

2/ Maternal deaths of Japanese nationals in Japan Proper except in 1943. Data for 1943 include maternal deaths of Japanese nationals in Okinawa and Karafuto as well as in Japan Proper. Maternal deaths in 1943, in Japan Proper are not available.

3/ Rates are the number of maternal deaths per 1,000 live births in the same period. Data refer to Japanese nationals in Japan Proper except for the year 1943 when data for Okinawa and Karafuto are also included.

"NA" indicates data are not available.

FOOTNOTES - Cont'd.

1/ TABLE 23. - CASTES OF SELFCTPTD CONMUNICABLE DIFEASTS: JAFAN, 1900 - 1948 (Cont'd)

FOOTNOTES :

Morbidity data for 1946, 1947, and 1948 are provisional.

Data refers to cases of communicable disease among the civilian population. Data are for Japan Froper and Okinawa, 1900-1994, assumed to be for Jegen Froger only. Population date refers to the total population in Japan and Okinawa, 1900-1019, and and for Japan Proper only 1937-1948. Case reporting for Okinawa was very incomplete and the total number of cases may be the estimated civilian population only in Japan Froper, 1920-1948.

2/ Diptheris includes croup, 1905-1923.

3/ Dysentery includes ekiri, 1922-1948.

"NA" indicates that data are not available.

A dash (-) indicates that no cases were reported.

TABLE 24. - CASE RATES FOR STIECTED COMMUNICAPLE DISEASES; ${\tt JAFAR}_{\tt V}: 1900 - 1948 \; ({\tt Gont}^{\tt A})$

FOOTNOTES:

Data for 1946, 1947 and 1948 are provisional.

Rates are the number of cases per 100,000 population. Case data refers to the civilian population in Japan Froper and Okinawa, 1900-1956 and to Japan Proper only, 1937-1948. Case data for Okinawa are very incomplete. Rates are based upon the total population in Japan and Okinawa, 1906-1919, and upon the estimated civilian population only in Japan Proper, 1920-1948.

Diptheria includes croup, 1905-1923.

3/ Dysentery includes ekiri, 1922-1948.

"NA" indicates that data are not available.

A dash (-) indicates that no cases were reported.

A rate of 0.0 indicates that there were some cases but the rate was less than 0.1.

SOUPCES:

Rates were computed by Public Health and Welfare Section, GHQ, SCAP,

Sources of case data are as follows:

Statistics of Notifiable Infectious Diseases, Sanitary Bureau, Home Department, 1924.

Statistics of Notifiable Infectious Diseases, Sanitary Bureau, Home Department, 1937. 1924-1934:

1935-1942: Annual Reports, Ministry of Welfare.

1943-1945: Unpublished Annual Reports, Ministry of Welfare,

1946-1948; Weekly Reports, Ministry of Welfare,

FOCTNOTES

- Data for 1946, 1947 and 1948 are provisional.
- Data refer to cases of communicable disease among the civilian population. Data are for Japan Proper and Okinawa, 1900-1936, Gase reporting for Okinawa was very incomplete and the total number of cases may be and for Japan Proper only 1937-1948. assumed to be for Japan Proper only. 1
- The unknown column contains delays and corrections for the 12 month period not contained in any monthly summary. 2
- Data Monthly totals are for five-week periods. All other monthly totals for 1946, 1947 and 1948 are for four-week periods. for the years 1900-1945 refer to calendar months. 3
- 4/ Data for paratyphoid fever are not available prior to August 1911.
- 5/ Data for epidemic meningitis are not available prior to April 1918.
- Diphtheria includes croup, 1905-1923.

9

- / Dysentery includes ekiri, 1922-1948.
- 8/ Data for malaria are not available prior to July 1946.
- Data for Japanese "B" encephalitis are not available prior to July 1946.

"NA" indicates that data are not available.

A dash (-) indicates that no cases were reported.

FOOTINGTES,

- Deta for 1946, 1947 and 1948 are provisional.
- 1/ Rates are the number of cases per 100,000 population and are computed on an annual basis. Case data refer to the civilian population in Japan Proper and Okinawa, 1900-1936, and to Japan Proper only, 1937-1948. Case data for Okinawa are very incomplete. Rates are bessed upon the total population in Japan Proper and Okinawa, 1900-1919, and on the estimated civilian population in Japan Proper, 1920-1948.
- 2/ Data for paratyphoid fever are not available prior to August 1911.
- 3/ Deta for epidemic meningitis are not available prior to April 1918.
- 4/ Diphtheria includes croup, 1905-1923.
- 5/ Dysentery includes exiri, 1922-1948.
- 6/ Data for malaria are not awailable prior to July 1946.
- $\mathcal{I}/$ Data for Japanese "B" encephalitis are not available prior to July 1946.
- "NA" indicates that data are not available.
- A dash () indicates that no cases were reported.
- A rate of 0.0 indicates that there were some cases but the rate was less than 0.1.

TABLE 26 - CASE RATES FOR SELECTED COMMUNICABLE DISEASES BY MONTH; JAPAN, 1900 - 1948 - Cont'& (Rates per 100,000 population)

SOURCES

Rates were computed by Public Health and Welfare Section, GHQ, SCAP. Sources of case data are as follows:

1900 - 1923: Statistics of Motifiable Infectious Diseases, Sanitary Bureau, Home Department, 1924.

1924 - 1934: Statistics of Notificials Infectious Diseases, Samitary Bureau, Home Department, 1937.

1935 - 1942: Annual Reports, Ministry of Welfare.

1943 - 1945; Unpublished Annual Reports, Ministry of Welfere.

1946 - 1948: Weekly Reports, Ministry of Welfare.

See footnotes next page.

Footnotes: -

- *Birth data for 1947 and 1948 are provisional. Death data for 1948 are provisional. The rates for both 1947 and 1948 are provisional.
- 1/ Data for 1900-1919 refer to births of Japanese nationals in Japan Proper and Okinawa. Data for 1920-1948 refer only to births of Japanese nationals in Japan Proper, except as follows. A small number of births of Japanese nationals outside of Japan is included in the tabulations for 1945. A small number of births of foreigners in Japan Proper is included from January through July 1945.
- 2/ Data for 1900-1919 refer to deaths of Japanese nationals in Japan Proper and Okinawa. Data for 1920-1948 refer only to deaths of Japanese nationals in Japan Proper except for the period January through July 1945, when a small number of deaths of foreigners in Japan and Japanese nationals outside of Japan was included.
- 3/ Excess births over deaths.
- The population data upon which rates are tased refer to the total population, including military personnel in the country, in Japan Proper and Okinawa for the period 1900-1919 and to the total population in Japan Proper, 1920-1948.

Sources:

Rates were computed by the Public Health and Welfare Section, GHQ, SCAP. Sources of birth and death data are as follows:

1900-1919: Annual Raport, Cabinet Bureau of Statistics, 1943.

1920-1943: Annual Reports, Cabinet Bureau of Statistics.

Unpublished tabulations, Cabinet Bureau of Statistics. 1944:

1945, January-July: Unpublished tabulations, Cabinet Bureau of Statistics. 1945, August-December: Unpublished tabulations, Cabinet Bureau of Statistics. Corrected by Public Health and Welfare, GdQ, SCAP, to exclude estimated deaths of Japanese nationals outside Japan and of foreigners in Japan Proper.

1946, January-June: Unpublished tabulations, Cabinet Bureau of Statistics. Corrected by Public Health and Welfare, GHQ, SCAP, to exclude births and deaths of Japanese nationals outside Japan Proper.

1946, July-September: Monthly Numeric Report, Cabinet Bureau of Statistics. Corrected by Public Health and Welfare, CHQ, SCAP, to exclude estimated births and deaths of Japanese nationals cutside Japan.

1946, October-December: Monthly Schedule Report, Cabinet Bureau of Statistics.

1947- Birth Data- Jamuary-June: Monthly Schedule Report, Cabinet Bureau of Statistics. July-December: Monthly Schedule Reports, Ministry of Welfare.

Death Data- Final Annual Report, Ministry of Welfare.

1948, Monthly Schedule Reports, Ministry of Welfare.

FOOTNOTES:

* Data for 1947 and 1948 are provisional.

Rates are the number of infant deaths per 1,000 live births in the corresponding period and area.

"MA" indicates data are not available.

1/ Monthly data refer to Japanese nationals in Japan Proper and Okinewa. 2/ Monthly data refer to Japanese nationals in Japan Proper.

SOURCES:

Rates were computed by Public Health and Welfare Section, GHG, SCAP. Sources of original data were as follows:

Nonthly data prior to 1937 are not available. 1937-1943: Annual Reports, Cabinet Bureau of Statistics.

1946, October-December; 1947, January-June: Monthly Schedule Reports, Cabinet Bureau of Statistics. 1946, July-September: Monthly Numeric Reports, Cabinet Bureau of Statistics.

TARKS 31 - INTRAVI DEATH RATES BY PREMECTURE: JARAN, 1920 - 1948 - Cont'd. (Rates per 1,000 live births each year)

POOTNOTES :

. Data for 1947 and 1948 are provisional.

Rates are the number of infant deaths per 1,000 live births in the corresponding period.

Data refer only to events to Japanese nationals in Japan Proper.

"MA" indicates data are not available.

SOUNCES :

Rates were computed by Public Health and Welfare Section, GHO, SCAP.

Sources of original date on infant deaths are as follows: 1920 - 1943: Annual Paporte, Cabinet Bureau of Statistics.

1947, January - June: Monthly Schedule Reports, Cebinet Bureau of Statistics.

1947, July - December; 1948; Monthly Schedule Reports, Ministry of Welfare.

FOOTWOTES

- * Data for 1947 and 1948 are provisional
- 1/ Dete for 1920-1942 refer to infent deaths of Japanese nationals in Japan Proper and Ckinawe. Date for 1943 refer to infant deaths of Japanese nationals in Japan Proper, Okinawa and Karafuto. Data for 1947 refers to Japanese nationals in Japan Proper. All data are based upon tabulations of death certificates.
- 2/ Typhoid fewer, 1920-1943; includes typhoid pneumonie. 1947-1948; excludes typhoid pneumonie.
- 3/ Date are for nine months, excluding January through Merch.
- Scarlet fever, 1920-1943; includes puerperel scarlet fever. 1947-1948; excludes puerperal scarlet fever.
- Diptheria, 1920-1922 and 1933-1943; excludes dirtheric endocerditis, includes croupous 'ronchitis and laryngeel croup. 1923-1932, excludes diptheric endocerditis and eroupous bronchitis; includes larynneal croup. 1947-1948; includes diphtheric endocarditis; excludes croupous bronchitis and laryngeal croup.
- / Data are for seven months, excluding January through May.
- T/ Tuberculosis (all forms). 1920-1943; includes chronic nleuro pmeumonis and all adenopothy; excludes spondylitis. 1947-1948; excludes chronic pleuro pneumonia and nontubercular acenopothy; includes spondylitis.
- Syphills, 1920-1922; excludes general paralysis of the insane and aneurysm of the sorts. 1923-1932; includes general paralysis aneurysm. 1933-1943: includes general paralysis of the insane, aneurysm of the aorts and a small amount of nonsyphilitic eneuof the insene, a small amount of nonsyphilitic parelytic psychosis, eneurysm of the aorts and a smell amount of nonsyphilitic rysm. 1947-1948; includes general paralysis of the insense and encurysm of the corta.
- 9/ Data are for eight months, excluding Jenuary through April.
- 10/ Bronchitis, 1920-.922 and 1933-1943; excludes croupous bronchitis, 1923-1932 and 1947-.948; includes croupous bronchitis.
- 111/ Pheumonia (all forms). 1920-1943: excludes typhoid pneumonia. 1947-1948: includes typhoid pneumonia.

"NA" indicates that data are not available.

A dash (-) indicates that no infant deaths were reported.

TABLE 33. - 1/ INVANT DEATH RATES FOR SELECTED CAUSES: JAPAN, 1920 - 1948 - Cont'd.

FOOTNOTES:

* Data for 1947 and 1948 are provisional.

Rates are the number of infant deaths per 1,000 live births in each year, Data for 1920-1942 refer to Japanese nationals Data for 1947 and 1948 refer to Japanese nationals in Japan Proper. Pates are computed from data based upon tabulations of birth In Japan Proper and Okinawa. Data for 1943 refer to Japanese nationals in Japan Proper, Okinawa and Karafuto. and death certificates.

Data are for nine months, excluding January through March. Rate is computed on an annual basis. Typhoid fever, 1920-1943; includes typhoid pneumonia, 1947-1948; excludes typhoid pneumonia,

Diphtheria, 1920-1922 and 1933-1943; excludes diphtheric endocarditis; includes croupous bronchitis and laryngeal croup. 1923-1928 excludes diphtheric endocarditis and croupous bronchitis; includes laryngeal croup. 1947-1948; includes diph-Scarlet fever, 1920-1943; includes puerperal scarlet fever, 1947-1948; excludes puerperal scarlet fever, theric endocarditis; excludes croupous bronchitis and laryngeal croup.

6/ Data are for seven months, excluding Jamary through May.

7/ Tuberculosis (all forms). 1920-1943; includes chronic pleuro pneumo

Syphilia. 1920-1922; excludes general paralysis of the insene and aneurysm of the aorta. 1923-1932; includes general Tuberculosis (all forms). 1920-1943: includes chronic pleuro pneumonia and all adenopathy; excludes spondylitis. 1948, excludes chronic pleuro pneumonia and nontubercular adenopathy; includes spondylitis. 8

paralysis of the insame, a small amount of nonsyphilitic paralytic psychosis, ameurysm of the sorts and a small amount of nonsyphilitic aneurysm. 1933-1943: includes general paralysis of the insene, aneurysm of the sorts and small includes general paralysis of the insane and aneurysm of the sorta, Data are for eight months, excluding January through April. Rate is computed on an annual basis. noneyphilitic aneurysm. 1947-1948;

1920-1922 and 1935-1943. excludes groupous bronchitis, 1923-1932 and 1947-1948; includes groupous bronchitis. Pneumonia (all forms). 1920-1943; excludes typhoid pneumonia, 1947-1948; includes typhoid pneumonia.

"NA" indicates that date are not available.
A dash (-) indicates that there were no infant deaths renorted.

A rate of 0.0 indicates that there were some infant deaths but that the rate was less than 0.1.

SOURCES:

Rates were computed by Public Health and Welfare Section, GHQ, SCAP,

Sources of original data are as follows:
1920-1943: Annual Reports, Cabinet Bureau of Statistice.
1947 (Jan-Jun): Monthly Schedule Reports, Cabinet Bureau of Statistice.
1947 (Jul-Dec): 1946: Monthly Schedule Reports, Ministry of Welfare

TABLE 35. - 1/ INFINI DEATH RATES FOR THE TEN LEADING CAUSES OF INFANT DEATHS IN 1948; (Rates per 1,000 live births each year) JAPAN, 1920 - 1948* - Cont'd.

FOOTNOTES:

* Data are not available for 1944-1946. **Data for 1947 and 1948 are provisional.

J/Rates are the number of infant deaths rer 1,000 live births in each year. Date for 1920-1942 refer to Japanese mationals in Japan Proper and Okinawa. Data for 1943 refer to Japanese nationals in Japan Proper, Okinawa and Karafuto.

3/Bronchitis. 1920-1922 and 1933-1943: excludes croupous bronchitis. 1923-1932 and 1947-1948: includes croupous Z/Pneumonia (all forms). 1920-1943: excludes typhoid pneumonia, 1947 and 1948: includes typhoid pretumonia. Data for 1947 and 1948 refer to Japanese nationals in Jaran Proper. bronchitis.

"NA" indicates that data are not available.

SOURCES

Rates were computed by Fublic Health and Welfare Section, GHU, SCAF.

Sources of original data are as follows:
1920-1943: Annual Reports, Cabinet Bureau of Statistics.
1947 (Jan-Jun): Monthly Schedule Reports, Cabinet Bureau of Statistics.
1947 (Jul-Dec): 1948: Monthly Schedule Reports, Ministry of Felfere.

FOOTNOTES:

- * Data for 1947 and 1948 are provisional.
- ** Monthly Data for 1941 include 7 stillbirths in Okinawa which are not included in the total. Since the number is negligible, the rate was computed per 1,000 live births in Japan Proper.

stillbirths reported without regard to the number of months of interoglistation. Data for 1925-1948 refer to stillbirths, after Sates are the number of stillbirths per 1,000 live births in the corresponding reriod. Data for 1920 - 1924 include all the third month.

"NM" indicates date are not available.

SOURCES

Rates were computed by Public Health and Welfare Section, GHQ, SCAP.

Sources of original data were as follows: 1920-1943: Annual Reports, Cabinet Bureau of Statistics. 1945, August-December: Unpublished tabulations, Cabinet Bureau of Statistics.

1946, January-June: Unpublished tabulations, Cabinet Bureau of Statistics. Birth data corrected by Public Health and Welfare Section. CHQ. SCAP to exclude estimated births of Japanese mationals outside Jaran Proper. 1946, July-September: Monthly Numeric Report, Cabinet Bureau of Statistics. Birth data corrected by Public Health and Welfare Section to exclude estimated births of Jaranese nationals outside Jaran Proper.

1946, Oct-Dec; 1947, January-June: Monthly Schedule Report, Cabinet Bureau of Statistics.

1947, July-December; 1948: Monthly Schedule Report, Ministry of Welfare.

TABLE 39. - STILLBIRTH RATES BY PREFECTURE: JAFAN, 1920 - 1948 - Cont'd.

FOOTNOTES:

*Data for 1947 and 1948 are provisional.

Rates are the number of stillbirths per 1,000 live births in the corresponding period.

Data refer only to events to Jaranese nationals in Japan Proper.

1920 - 1924: Data include all stillbirths reported, without regard to number of months of interogestation.

1925 - 1948: Data refer to stillbirths after the third month.

"Ma" indicates data are not available.

SOURCES:

Rates were computed by Public Health and Welfare Section, GHQ, SCAP.

Sources of original stillbirth data are as follows:

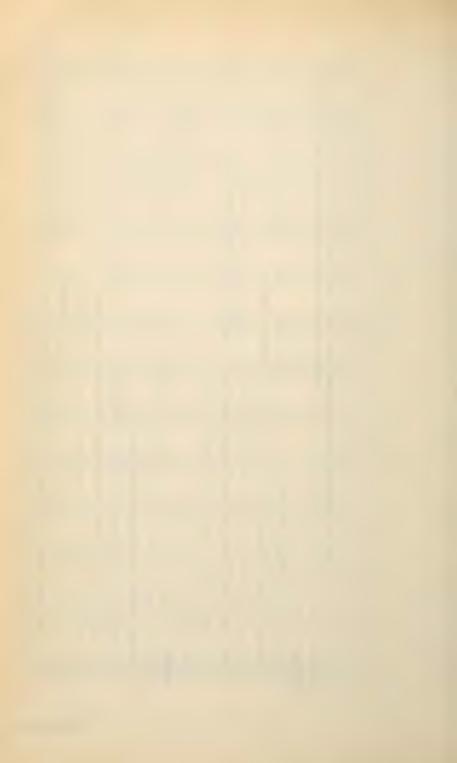

1920 - 1943: Annual Reports, Cabinet Bureau of Statistics.

1946, January - June: Unpublished tabulations, Cabinet Bureau of Striffics.
1946, July - September: Monthly Numeric Reports, Cabinet Bureau of Statistics,

1946, October - December: Monthly Schedule Reports, Cabinet Bureau of Statistics.

1947, January - June: Monthly Schedule Reports, Cabinet Bureau of Statistics.

1947, July - December; 1948: Monthly Schedule Reports, Ministry of Welfere.

POOT NOTES

*Data for 1947 and 1948 are provisional.

Rates are the number of divorces per 1,000 population and are computed on an annual besis. Divorce data refer to divorces of Jaganese nationals in Jagan Froger. Population data refer to the total population, including military personnel, in Japan Proper.

"NA" indicates data are not available.

Source

Rates were computed by Public Health and Welfare Section, GHQ, SCAP.

Populations were estimated by Fublic Health and Welfare Section, GHQ, SGAP. Estimates were based upon census data, net natural increase and migration to and from Japan Proper. Data for 1920-1943 are as of 1 October. Estimates for 1946-1948 are as of 1 July.

Sources of divorce data are as follows:

1920-1943: Annual Reports, Cabinet Bureau of Statistics.

1946, July-September: Monthly Numeric Report, Cabinet Bureau of Statistics.

1946, October- December; 1947, January-June: Monthly Schedule Report, Cabinet Bureau of Statistics.

1947, July-December; 1948: Monthly Schedule Report, Ministry of Welfare.

TABLE 47. - DIVORCE RATES BY PREFECTURE: JAPAN, 1920 - 1948 - Cont'd.

POOTNOTES

* Data for 1947 and 1948 are provisional.

Rates are the number of divorces per 1,000 population. Population data refer to the total population of Japan Proper, including military personnel in the country. Divorce data refer only to divorces of Japanese netionals in Japan Proper.

"Ma" indicates data are not available.

SOURCES:

Rates were computed by Public Health and Welfare Section, GHQ, SCAP.

Sources of original divorce data are as follows:

1920 - 1943: Annual Reports, Cabinet Bureau of Statistics.

1947, January - June: Monthly Schedule Reports, Cabinet Bureau of Statistics.

1947, July - December, 1948: Monthly Schedule Reports, Ministry of Welfare.

FOOTNOTES:

A dash (-) indicates that no deaths were reported and that the death rate was zero.

A rate of 0.0 indicates that there were some deaths but that the rate was less than 0.1.

SOURCES:

Rates were computed by Public Health and Welfare Section, GHQ, SCAP.

Sources of original death data were Monthly Vital Statistics Schedule Reports, Ministry of Welfare.

TABLE 57. - DEATH RATES FOR SELECTED CAUSES BY PREFECTURE: JAPAN, 1948 - Cont'd.

FOOT NOTES:-

A rate of 0.0 indicates that there were some deaths but the rate was less than 0.1. A dash (-) indicates that no deaths were reported and the death rate was zero. Data refer to deaths of Japanese nationals in Japan Proper.

OURCES

Rates were computed by Public Health and Welfare Section, GHQ, SCAP. Sources of death data were Monthly Vital Statistics Schedule Reports, Ministry of Welfare.

TABLE 50, - DEMPT RATE, ALE DELECTED CAUSES OF HONTH BY THE FECTIFE: JAPAN, 1949 - Contid (Rates per 100,000 population per annum)

FCOUNCT

Deta refer to deaths of Japanese nationals in Japan Troper.

A dash (-) indicates that no deeths were reported and the death rate was zero.

A rate of 0.0 indicates that there were some deaths but the rate was less than 0.1.

CURCE

Fates were computed by Public Health and Welfare Section, GHC, SCAP.

Scurces of death data were Monthly Vital Statistics Schedule Reports, Ministry of Welfare.

TABLE 60 - MATERNAL DEATHS AND DEATH RATES BY MONTH: JAPAN 1948

International list number includes some related diseases in addition to the one shown here.

Sources:

Rates were computed by Public Health and Welfare Section, GHQ, SCAP.

Sources of original data are as follows:

^{1/} Cases are the number reported in weekly morbidity reports and are for 52 weeks. Deaths are the number reported in monthly analyses of death certificates and are for the calendar year.

^{2/} Death data include typhus-like diseases also.

[&]quot;NA" indicates that data are not available.

A dash (-) indicates that no cases or deaths were reported and the case or death rate was zero.

A rate of 0.0 indicates that there were some cases or deaths but the rate was less than 0.1.

Case data: Weekly Morbidity Reports, Ministry of Welfare. Death data: Monthly Vital Statistics Schedule Reports, Vinistry of Welfare.

TABLE 68

COMMUNICABLE DISEASE CASES AND DEATHS AND COMMUNICABLE DISEASE CASE AND DEATH RATES BY FREFECTURE: JAPAN, 1948 - Cont'd (Rates per 100,000 population per annum)

FOOTNOTES:

- International list number includes some related diseases in addition to the one shown here.
- 1/ Death data include typhus-like diseases also.

 Case data are for the 52 week period ended 25 December. Death data are for the calendar year.

 There were no cases or deaths from plague, chelera or yellow fever.

 "NA" indicates that data are not available.

 A dash () indicates that no cases or deaths were reported and the case or death rate was zero.

A rate of 0.0 indicates that there were some cases or ceaths but the case or ceath rate was less than 0.1.

SOURCES:

Rates were computed by Public Health and Welfare Section, GHQ, SCAP.

Sources of original data are as follows:

Case data: Weekly Morbidity Reports, Ministry of Welfare.
Death data: Monthly Vital Statistics Schedule Reports, Ministry
of Welfare.

Sources of original data were Weekly Morbidity Reports, Ministry of Welfare. A rate of 0.6 indicates that some cases were reported but the rate was less than 0.1. A dash (-) indicates that no cases were reported and the case rate was zero. Rates were computed by Fublic Health and Welfare Section, GHD, SCAF. there were no cases of choters, plague of yellow lever during 1940. Sources

Original data are for 7 months (June-December) and rate is per 1,000 live births in the corresponding period. 1/ Deaths under 1 year of age. 2/ Original data are for 7 months (June-December) and rate is per Data refer to infant deaths of Japanese nationals in Japan Proper. "NA" indicates data are not available.

Footnotes continued on next page.

TABLE 74. - 1/ INFANT DEATH FAIRS FOR SELECTED CAUSES BY MONTH: JAPAN, 1948 (Rates per 1,000 live births each month)

FOOTNOTES:- Cont'd.

A rate of C.O indicates that there were some deaths but that the rate was less than C.l. A dash (-) indicates that no deaths were reported and that the death rate was zero.

SCURCES 1-

Sources of original data were Monthly Vital Statistics Schedule Reports, Ministry of Welfare. Rates were computed by Public Health and Welfare Section, GHQ, SCAP.

TABLE 75. - INFANT DEATHS FROM SELECTED CAUSES BY PREFECTURE: JAPAN, 1948 - Cont'd.

FOOTNOTES

1/ Erysipelas: Data are for 7 months, excluding January through May.

Data refer to infant deaths (deaths under 1 year of age) of Jaranese nationals in Japan Proper. "NA" indicates data are not available.

A dash (-) indicates that no infant deaths were reported.

TABLE 76. - INFANT DEATH RATES FOR SELECTED CAUSES BY PREFECTURE: JAPAN, 1948 - Cont'd.

FOOTNOTES:

1/ Erysipelss: Rates are based upon data for 7 months, excluding January through May.

Data refer to infant deaths (deaths under 1 year of age) of Japanese nationals in Japan Proper.

A desh (-) indicates that no infant deaths were reported and that the infant death rate was zero.

A rate of 0.0 indicates that there were some infant deaths but that the rate was less than 0.1.

SOURCES

Rates were computed by Public Health and Welfare Section, GHQ, SCAP.

Sources of original data were Monthly Vital Statistics Schedule Reports, Ministry of Welfare.

TABLE 77. - INFANT DEATHS FROM SELECTED CAUSES BY MONTH BY PREFECTURE: JAPAN, 1948 - Cont'd

FOOTNOTES,

1/ Erysipeles: data are for 7 months, excluding January through May.

Data refer to infant deaths (deaths under 1 year of see) of Japanese nationals in Japan Proper. NA indicates data are not available.

A dash (-) indicates date are not available.

Sources are Monthly Vital Statistics Schedule Reports, Ministry of Welfare.

TABLE 78. - INFANT DEATH RATES FOR SELECTED CAUSES BY NOWTH BY PREFECTURE: JAPAN, 1948 (Rates per 1,000 live births each month)

TABLE 78. - INFANT DEATH RATES FOR SELECTED CAUSES BY MONTH BY PREFECTURE: JAPAN, 1948 - Cont'd (Rates per 1,000 live births each month)

FOOTNOTES

Data refer to infant deaths (deaths under 1 year of age) of Japanese nationals in Japan Proper.

A dash (-) indicates that no infant deeths were reported and that the infant death rate was zero. A rate of 0.0 indicates that there were some deaths but that the rate was less then 0.1.

SOURCES

Sources of original data were Monthly Vital Statistics Schedule Reports, Ministry of Welfare. Rates were computed by Public Health and Welfare Section, GHQ, SCAP.
